PROFILE

B.E. Information Technology student (Class of 2028) at ISL Engineering College, Hyderabad, specializing in Data Science, Machine Learning pipelines and full-stack web development. Completed a 10-week Google AI-ML Virtual Internship with Grade O (Outstanding), and earned a Certificate of Excellence in Data Science from Full Stack Academy Center of Excellence. Experienced in building autonomous LLM agents, security analytics tools and scalable web platforms, and an active participant in national-level hackathons and entrepreneurship competitions, with 18 public repositories on GitHub (mohammedsuhail0).

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology, expected 2028
ISL Engineering College, Hyderabad, Telangana, India
Relevant coursework: Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Database Management Systems (SQL), Web Technologies, Software Engineering, Object-Oriented Programming.

RESEARCH AND TECHNICAL INTERESTS

Autonomous AI agents and LLM applications; machine learning pipelines and predictive modelling; security threat analytics; data analysis and visualization.

TRAINING AND PROFESSIONAL EXPERIENCE

Google Virtual Intern, AI/ML, Oct 2024 – Dec 2024
Google for Developers (India Edu Program), supported by AICTE and EduSkills

- Completed a 10-week curriculum in machine learning algorithms, deep neural network architectures and data engineering; graduated with Grade O (Outstanding).
- Built, evaluated and fine-tuned predictive ML models using Python, TensorFlow and Scikit-Learn on real-world datasets.
- Implemented computer vision and natural language processing pipelines, with hyperparameter tuning to improve cross-validation accuracy.

Data Science Specialization Trainee, Oct 2025 – Jan 2026
Full Stack Academy Center of Excellence, Hyderabad, India

- Awarded the Certificate of Excellence for end-to-end data science pipelines, statistical hypothesis testing and machine learning deployment.
- Built automated data cleaning, exploratory data analysis (EDA) and multivariate regression workflows that produced structured predictive reports.

LEADERSHIP, TEACHING AND ENTREPRENEURSHIP

Founder, Claude Code & Cowork (CCC) Club (C3), ISL Engineering College, 2026

- Selected by the HOD as one of three students to teach juniors; chose data science. Pitched the club to the chairman and student welfare, and it is being set up as a separate club focused on shipping real products and freelance work.
- Designed a four-event launch session: CTalk (panel discussion), The Verdict (AI tools on trial), Deconstruct (startup teardowns) and Prompt-to-Prod (hands-on build-and-deploy with Claude Code, Git and Vercel).
- Host of the CTalk panel discussion on unemployment. Built the club website (c3club.vercel.app).

SELECTED PROJECTS

AI Email Agent | Python, LangChain, LLMs, FastAPI, Tailwind CSS | github.com/mohammedsuhail0/AIAGENT

- Engineered an autonomous LLM-powered assistant using multi-step reasoning agents to parse incoming emails, extract action items and draft context-aware replies.
- Implemented asynchronous REST endpoints with FastAPI to speed up email triage and reduce response latency by about 70%.

ShieldSense: AI Security Threat Agent | Python, FastAPI, Security Analytics, ML | github.com/mohammedsuhail0/PUNKRECORDS-SPIH168-

- Built an automated monitoring agent that analyzes server logs and user audit trails to detect suspicious anomalies in real time.
- Devised heuristic risk scoring and automated notification dispatch for rapid vulnerability containment.

AI Maternal Monitor | FastAPI, Next.js 14, scikit-learn, LLMs | github.com/mohammedsuhail0/AI-mternity-nanny-

- Built a full-stack maternal and fetal health monitoring platform with patient vitals, fetal monitoring, risk-assessment history, a clinician dashboard and a patient-companion chat with emergency detection.
- Developed a scikit-learn pipeline for C-section risk prediction, then added an LLM layer that explains patient risk in plain language.

Hyderabad House Rental Analytics | Python, Pandas, Scikit-Learn, Power BI | github.com/mohammedsuhail0/house-rentalanalytics

- Collected and structured multi-variable real estate data across Hyderabad; trained multivariate regression models to predict rent benchmarks.
- Designed interactive Power BI dashboards showing price elasticity and geographic demand heatmaps.

Smart Attendance Management System | TypeScript, React, Node.js, SQL, Tailwind CSS | smart-attendance-ecrunu.vercel.app

- Architected a responsive attendance platform with role-based access control, live session synchronization and automated CSV/PDF report generation.
- Optimized database query indexing and state caching to keep the UI responsive during batch student verification.

Secure Online Examination Portal | JavaScript, HTML5, CSS3, Vercel | secure-online-exam-portal-zt.vercel.app

- Created a secured test-taker client with anti-malpractice hooks, synchronized timers and dynamic question scrambling.

Personal Portfolio | React, TypeScript, Vite, Three.js, GSAP, Lenis | mohammed-suhail.vercel.app

- Built a space-themed portfolio with a particle portrait, scroll-reveal animations and a horizontal-scroll project section.

CERTIFICATIONS AND AWARDS

- Certificate of Excellence, Data Science Specialization, Full Stack Academy Center of Excellence (Jan 2026)
- AI-ML Virtual Internship Certificate, Grade O (Outstanding), Google for Developers, AICTE and EduSkills (Dec 2024)

HACKATHONS AND COMPETITIONS

- **Smart India Hackathon (SIH 2024):** competed on National Problem Statement 26133 with Team Punk Records.
- **SPEC's Industry Hack 2026:** 24-hour national hackathon at St. Peter's Engineering College, solving industrial challenges.
- **HackForge 2.0:** 12-hour rapid innovation sprint at ISL Engineering College.
- **Eureka! National Entrepreneurship Challenge:** pitching participant, E-Cell IIT Bombay.
- **FSA Hackathon:** web application prototype sprint, Full Stack Academy.
- **Smart India Hackathon 2026 (internal round):** ISL Engineering College, 11 Aug 2026; registered under the Student Innovation track, with the AI Maternal Monitor as the team's showcase project.
- **Tata Elxsi TELIPORT Season 4:** registered with Team Punk Records; Round 1 idea submission on a battery energy system design platform.
- **Eureka! (college round):** pitched 0Queue, an original self-checkout concept for Indian retail that combines existing barcodes, exit QR codes and weight verification.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL, HTML5, CSS3
- **AI / Machine Learning:** PyTorch, TensorFlow, Scikit-Learn, Pandas, NumPy, LangChain, LLMs, Prompt Engineering, Exploratory Data Analysis
- **Web and Frameworks:** React.js, Next.js, FastAPI, Node.js, Tailwind CSS, RESTful APIs
- **Databases and Tools:** PostgreSQL, MongoDB, MySQL, Vercel, Supabase, Git, GitHub, Docker, Power BI
